Education

Institute of Engineering and Rural Technology, Prayagraj Nov 2022 - June 2026
Bachelor of Technology in Computer Science and Engineering
H.A.L. School Korwa, Amethi (Senior Secondary - XII) May 2022
H.A.L. School Korwa, Amethi (Secondary - X, CBSE) May 2020

Certifications

Hindustan Aeronautics Limited, Amethi (IT Trainee) July 2025
Udemy (The Complete Full-Stack Web Development Bootcamp) Sept 2025
IBM SkillsBuild (Getting Started with Generative AI) Nov 2025

Work Experience

Hindustan Aeronautics Limited, Amethi June 2025 - July 2025
Information Technology Trainee

- Gained hands-on exposure to IT systems, software tools, and enterprise applications.
- Assisted in system audits ensuring compliance with IT standards and software security.
- Gained some problem solving skill techniques.

Technical Skills

Programming Languages: C++, Javascript (ES6+)
Frameworks and Libraries: React.js, Express.js, Node.js, Socket.io, EJS, JWT Authentication, REST API, Mongoose ODM
Deployment & Tools: Render, Vercel, Git, GitHub, Postman, Thunder Client
Databases and Cloud: MongoDB, MySQL, Redis (Basic), Cloudinary, Razorpay API

Projects

College Fees Management System — Live Link

- Automated fee collection and late fine logic with real-time payment tracking and Admin/Student dashboards.
- Integrated **Razorpay API** for payments and **Puppeteer** for dynamic server-side PDF receipt generation.
- Utilized **Bull + Redis** for background email/PDF tasks and **Cloudinary** for cloud receipt storage.

Voting System Backend API — GitHub Repo

- Developed a secure voting system backend using **Node.js**, **Express.js**, and **MongoDB**.
- Implemented **JWT Authentication** and **Role-Based Access Control (RBAC)** to differentiate Admin and Voter privileges.
- Enabled candidate management functionalities including candidate creation, update, deletion, and vote tracking.
- Designed secure voting logic preventing duplicate votes and restricting administrators from participating in voting.
- Built RESTful APIs for user registration, login, profile management, vote casting, and real-time vote count retrieval.

QuickChat: Real-Time Chat Application — Live Link

- Built a real-time messaging platform using the **MERN stack** and secure WebSocket connections via **Socket.io**.
- Implemented dynamic user status indicators (Online/Offline) and an automated unread message notification badge system.
- Integrated an unsigned media pipeline using **Cloudinary API** and stream buffers for direct chat image attachments.
- Designed a responsive UI with modern layout styling, safe state distribution, and profile data management.
